

**Amendment to the Claims:**

This listing will replace all prior versions, and listings, of the Claims in this application.

**Listing of Claims:**

1. (Currently amended) A disposable article comprising:
  - a. a basesheet; and
  - b. an aqueous solution incorporated onto said basesheet, said aqueous solution including a fragrance, at least one cocopolyglucose or arginine cocoate mild surfactant, at least one moisturizer, and at least one preservative, wherein said disposable article ~~capable of being heated~~ is heatable to a select temperature at least twice while maintaining chemical stability.
2. (Original) The disposable article of claim 1 wherein said article is moist.
3. (Original) The disposable article of claim 1 wherein said basesheet is a nonwoven.
4. (Original) The disposable article of claim 3 wherein said nonwoven is formed from a blend of viscose-lyocell fibers and polyester fibers.
5. (Original) The disposable article of claim 3 wherein said nonwoven is formed from a blend of rayon fibers and polyester fibers.
6. (Original) The disposable article of claim 1 wherein said fragrance is molecularly entrapped within a cyclodextrin complex.
7. (Original) The disposable article of claim 1 wherein said fragrance includes at least two aroma compounds, each of said aroma compounds having at least one base note which is thermostable up to at least about 75°C.

8. (Original) The disposable article of claim 7 wherein at least one of said aroma compounds is an essential oil.

9. (Original) The disposable article of claim 8 wherein said essential oil is ylang ylang, coriander, grapefruit, lavender, white thyme, mandarin orange oil, tuberose, jasmine, lavadin, galbanum, clove leaf, eucalyptus or geraniol.

10. (Currently amended) A disposable article comprising:  
a. a nonwoven basesheet; and  
b. an aqueous solution incorporated onto said basesheet to form a moist basesheet, said aqueous solution including a fragrance, at least one cocopolyglucose or arginine cocoate mild surfactant, at least one moisturizer, and at least one preservative,

wherein said article ~~capable of being heated~~ is heatable to a temperature of from about 37°C to about 75°C at least twice while maintaining chemical stability.

11. (Original) The disposable article of claim 10 wherein said nonwoven basesheet is formed from a blend of viscose-lyocell and polyester fibers.

12. (Currently amended) The disposable article of claim 10 wherein the mild surfactant is ~~an amphoteric~~ a copolyglucose surfactant.

13. (Currently amended) The disposable article of claim 10 wherein the mild surfactant is ~~an anionic~~ arginine cocoate surfactant.

14. (Original) The disposable article of claim 10 wherein at least one of said mild surfactants is thermostable to at least about 75°C.

15. (Original) The disposable article of claim 10 wherein at least one of said preservatives is thermostable to at least about 75°C.

16. (Currently amended) A disposable article comprising:

- a. a nonwoven basesheet; and
- b. an aqueous solution incorporated onto said basesheet to form a moist basesheet, said aqueous solution including a fragrance having at least two aroma compounds, each of said aroma compounds having at least one base note which is thermostable up to at least about 75°C, and at least one of said aroma compounds is an essential oil, at least one cocopolyglucose or arginine cocoate mild surfactant which is thermostable to at least about 75°C, at least one moisturizer, and at least one preservative which is thermostable to at least about 75°C,

wherein said article ~~capable of being heated~~ is heatable to a temperature of from about 37°C to about 75°C at least twice while maintaining chemical stability.

17. (Original) The disposable article of claim 16 further comprising a skin lubricity agent.

18. (Original) The disposable article of claim 16 wherein said article is chemically stable to heating of up to about 5 minutes from about 37°C to about 75°C in a sequence of two or more cycles.

19. (Original) The disposable article of claim 16 wherein said article is chemically stable to heating at about 75°C in a sequence of six cycles, each cycle having a duration of about 1.5 minutes.

Claims 20-34 (Canceled)

35. (New) The disposable article of claim 1 used by a method comprising the steps of:

- a. providing a package containing a plurality of individual basesheets, each basesheet having said aqueous solution incorporated thereon;
- b. heating said package to a select temperature above body temperature;
- c. removing at least one of said individual basesheets from said package leaving at least one of said individual basesheets remaining within said package; and
- d. reheating said package containing said remaining individual basesheets at least once to a select temperature above room temperature while maintaining chemical stability.

36. (New) The disposable article of claim 35 wherein the package containing the individual basesheets is heated to a temperature of from about 37°C to about 75°C.

37. (New) The disposable article of claim 35 wherein the package containing the individual basesheets is heated to a temperature of from about 45°C to about 70°C.

38. (New) The disposable article of claim 35 wherein the package containing the individual basesheets is heated to a temperature of from about 55°C to about 65°C.

39. (New) The disposable article of claim 35 wherein the package containing the remaining individual basesheets is reheated at least once to a temperature of from about 37°C to about 75°C.

40. (New) The disposable article of claim 35 wherein the package containing the remaining individual basesheets is reheated at least once to a temperature of from about 45°C to about 70°C.

41. (New) The disposable article of claim 35 wherein the package containing the remaining individual basesheets is reheated at least once to a temperature of from about 55°C to about 65°C.

42. (New) The disposable article of claim 35 further comprising the step of heating the package containing the individual basesheets for a select time.

43. (New) The disposable article of claim 42 wherein the package containing the individual basesheets is heated for at least about 10 seconds.

44. (New) The disposable article of claim 42 wherein the package containing the individual basesheets is heated for about 120 seconds.

45. (New) The disposable article of claim 42 wherein the package containing the individual basesheets is heated for about 90 seconds.

46. (New) The disposable article of claim 35 further comprising the step of reheating the package containing the remaining individual basesheets at least once for a select time.

47. (New) The disposable article of claim 46 wherein the package containing the remaining individual basesheets is reheated at least once for at least about 10 seconds.

48. (New) The disposable article of claim 46 wherein the package containing the remaining individual basesheets is reheated at least once for about 45 seconds.

49. (New) The disposable article of claim 46 wherein the package containing the remaining individual basesheets is reheated at least once for about 30 seconds.
